Affiliation with IAO International Association For Orthodontics

The IAO has been assisting general dentists for the past 50- years. Dentists are encouraged to join the IAO and to try to achieve some credentials through the IAO.

SEE WHAT OUR STUDENTS ARE SAYING...

"This course literally changed my life. I am now working less, making more money, loving every minute of it."

Dr. Tamara Gant

"This is a course that all general dentists should take whether or not they intend to practice orthodontics regularly."

Dr. Oswald Dunn

"An eye opening course that makes one a better clinician in all aspects of dentistry."

Dr. Vigen Simchian

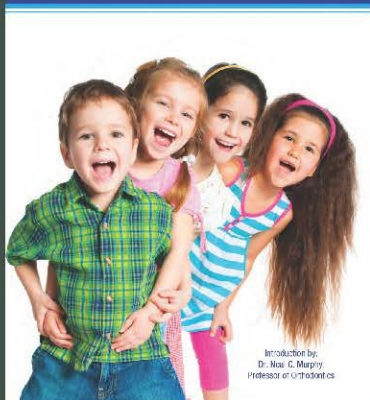

"I can't imagine practicing dentistry without taking this course. Rondeau Seminars has given me the tools to allow patients to get comprehensive treatment in my office with early and accurate diagnosis. It's a win-win for patients and doctors."

Dr. Shaina DiMariano

AVAILABLE ON AMAZON

Rondeau Seminars simplifies the process of integrating orthodontics into your general practice. Discover how Early Orthodontic Treatment can not only elevate your practice but also boost your income and reignite your passion for coming to work each day! By emphasizing airway and TMD health, you will gain the knowledge to enhance the overall well-being of your patients.

Pre-treatment

Post-treatment

PHILOSOPHY OF ORTHODONTIC TREATMENT

Two Phase Orthodontic Treatment

The goal of early treatment is to develop the arches in order to prevent the need for permanent teeth extractions. Parents frequently seek interceptive orthodontic treatment from general dentists for their children.

Anterior Crossbite

Single Tooth Anterior Crossbite

Central Lingually Displaced

Anterior Screw Appliance

Crossbite Corrected

Broad Arch Straight Teeth

Weak Smile

Broad Smile

COURSE OBJECTIVES

The goal of this comprehensive program is to empower general and pediatric dentists with the expertise needed to diagnose and handle simple orthodontic cases. Emphasis will be placed on thorough record-keeping and precise diagnosis. The treatment will mainly consist of a combination of functional appliances, particularly during the mixed dentition phase, and fixed orthodontic braces (using the straight wire technique) for permanent dentition. Rondeau Seminars' structured methodology, paired with organizational and marketing strategies, facilitates the seamless incorporation of orthodontics into your general practice.

THE IMPORTANCE OF STAFF TRAINING

Staff are vital to your dental practice. Dentists can invite two staff members to **attend Level I, Session 1 at no charge**, where they will learn about the importance of early treatment and their role in implementing this service. Staff can participate in all four sessions or choose **ONLINE ORTHODONTIC STAFF TRAINING**, gaining essential knowledge to support orthodontic treatment and help patients achieve broad arches, healthy TMJ, patent airway and improved overall health.

THE BENEFITS OF FUNCTIONAL PHILOSOPHY

Phase One: Mixed Dentition Age 4-12

- Constricted Arches
- Posterior Crossbite
- Anterior Crossbite
- Anterior Open Bite
- Thumbsucking Habit
- Mouth Breathing
- Airway Problems
- Retrognathic Mandible
- Deep Overbite
- Midface Deficiencies

Phase Two:

Permanent Dentition Age 12-14

- Straighten the Teeth

YOU MUST TREAT EARLY

90% of the face is developed by age 12. If you want to guide the growth of your younger patients, you must treat early with functional appliances.

LEVEL I INTRODUCTION TO ORTHODONTICS

SESSION 1

- Philosophy of Orthopedic Orthodontic-TMJ Treatment
- Diagnostic Records
- Cephalometrics as a Diagnostic Tool
- Introduction to Cephalometrics
- Habit Breaking Appliances
- Removable MX Expansion Appliances
 - Schwarz Appliance
- Removable MD Expansion Appliances
 - Schwarz
- Fixed Expansion Appliances
- Fixed Molar Distalization Appliances
- Practice Management

SESSION 2

- Class II Malocclusions
- Functional Appliances
 - Rick-A-Nator
 - Twin Block
 - Twin Block II
 - Multi FA Appliance
- Introduction to Straight Wire Appliances
- Indications and Properties of Various Archwires
- Straight Wire Mechanics
 - Tying
 - Separators
 - Open and Closed Coils
 - Power Chain
 - Elastics
- Bracketing Technique
- Banding of Molars
- Advanced Cephalometrics
- Hands-on Placement of Orthodontic Brackets and Wires on Typodont

SESSION 3

- Class III Malocclusions
 - Clinical Cases
 - Anterior Sagittal
 - Tandem Appliance
 - Multi FA Appliance
- How to Establish a Potent Airway
- Detrimental Affects of a Constricted Airway
- Rocking Chair Curves
 - Lab Exercises
- Importance of TMJ in Orthodontics
- Anatomy of Temporomandibular Joint
- TMJ Health Questionnaire
- Range of Motion
- Muscle Palpations
- Joint Vibration Analysis (JVA)
- Different Types of Splints
 - Phase I Splint Therapy
 - Phase II Orthodontic Case Finishing

SESSION 4

- Fixed Molar Distalization Appliances
- Non-Surgical Treatment Open Bite Cases
- How to Diagnose Vertical Problems
- How to Control Vertical Problems
- Clear Braces
- Clear Aligners
- MARA Appliance
- Fixed Functional Appliances
 - Self-activating Nickel Titanium Coil Springs
- Case Finishing
- Retention
- Practice Management
 - Internal Marketing
 - External Marketing

Group Case Diagnosis Sessions 3 & 4

Participants can present new and progress cases to the group for discussion

LEVEL I INTRODUCTION TO ORTHODONTICS

132 hours
Continuing
Education

COURSE OBJECTIVE

This comprehensive 4 session, 8 day program is designed to educate both general and pediatric dentists on the diagnosis and treatment of basic orthodontic cases. Emphasis will be placed on thorough record-keeping and accurate diagnosis. The treatment approach will involve the use of functional appliances, especially during mixed dentition, as well as fixed orthodontic braces (utilizing the straight wire technique) in permanent dentition. This organized, systematic method, along with marketing advice, makes it easier to incorporate orthodontics into your general practice.

Participating in this course provides a notable advantage in acquiring clinical experience. The sessions are led by a team of experienced and dedicated instructors who guide participants in merging orthodontics into their general practice. Many of these instructors boast over twenty years of orthodontic expertise and are exceptionally qualified to teach various aspects of the Rondeau Seminars Courses.

LEVEL II ORTHODONTICS

COURSE OBJECTIVES

This two-session, four-day course is tailored for individuals who have completed Level I Introduction to Orthodontics or those already practicing orthodontics who wish to enhance their skills in case diagnosis, treatment planning, and case finishing. Discover a patient treatment system that prioritizes stabilizing the temporomandibular joint before starting orthodontic procedures. Apply these essential skills in your practice to create beautiful smiles, ensure patent airway, and promote healthy TMJ.

SESSION 1

- Fixed Expansion Appliances
- Bolton Analysis
- Rick-A-Nator
- Composite Buidups
- Eruption of Impacted Cuspids
- Posterior Sagittal Appliance
- Class II Skeletal
- MARA Appliance
- Multi FA Appliance
 - Class II
 - Class III
- Distalization of Molars
- Self-ligating Brackets
- Straight Wire Mechanics
- Ortho-TMD-Sleep Connection

SESSION 2

- Airway Obstruction in Children
- Diagnosis and Treatment of Children with Sleep Apnea
- Tandem Appliance (fixed)
- Class III Skeletal
- Double Arch Mechanics
- Open Bite Cases
 - Hyrax with crib
 - AMCOP
 - Froggy Mouth
- Fixed Anterior Sagittal Appliance
- Fixed Molar Distalizer
- Phase I TM Jaw Stabilization
- Phase II Orthodontic Case Finishing

**14 hours
per
session**

COMPREHENSIVE COURSE ON CLEAR ALIGNERS

COURSE OBJECTIVES

If you are struggling with frequent adjustments, unexpected tooth movements, and confusion about attachments, then this course is designed specifically for you. In a thorough 2-session, 4-day program, you'll gain valuable insights into tooth movement, attachments, diagnosis, and treatment planning, simplifying the process of providing aligner therapy to your patients. With an emphasis on maintaining a patent airway and healthy TMJ, this course will deepen your understanding of Clear Aligner Therapy, empowering you to help your patients achieve straight teeth, open airway, and healthy jaw joints.

SESSION 1

- Summary of complete records
- Differential diagnosis
- Informed Consent for Aligner Therapy
- Phase I treatment
 - Treat the face; jaw orthopedics first
- Techniques for digital scanning and impressions
- Clin Checks
- Summary of Attachments
- Diagnosis and treatment planning
- 4 Cardinal Rules of Clear Aligner case selection
- IPR
- TMD, Sleep and Airway Screening

DIAGNOSIS & TREATMENT OF TM DYSFUNCTION

COURSE OBJECTIVES

The American Dental Association estimates that 34% of adults experience TMD (Temporomandibular Dysfunction). Unfortunately, TMD is not a common subject in most dental or medical schools across North America. This course is designed to equip dentists with the skills to diagnose and treat patients suffering from TMD. Participants will learn how to fabricate daytime splints to alleviate clicking and painful symptoms, as well as nighttime appliances to help prevent clenching and grinding. Throughout this comprehensive course, numerous clinical cases will be presented for better understanding.

ITINERARY

- Anatomy of the TM joint
- Muscles of Mastication
- Causes of TM Dysfunction
- Clinical Examination
 - Patient History
 - Muscle Palpations
 - Range of Motion
 - Postural Assessment
- Joint Vibration Analysis (JVA)
- TMJ X-rays, Tomograms, CBCT
- Differential Diagnosis
 - Intra-capsular vs. Extra-capsular
- Five stages of internal derangement (Disc Displacement)
- Bite registration for splint therapy (phonetic bite)
- Types of Splints
- Phase I: Splint therapy (4 months)
- Phase II: Orthodontic Case Finishing (12-24 months)
- Internal marketing for TMJ practice
- External marketing for TMJ practice
- Billing and insurance

DENTIST'S ROLE IN SNORING & SLEEP APNEA

COURSE OBJECTIVES

It has been estimated that 50% of men over age 50 snore and approximately 25% have life threatening sleep apnea. Health problems include high blood pressure, acid reflux, heart attacks, strokes, Type 2 Diabetes. This course aims to provide comprehensive, step-by-step insights into snoring and sleep apnea. By the end of this program, participants will develop a thorough comprehension of these conditions, enabling them to communicate proficiently with patients about snoring and sleep apnea. Patients much prefer oral appliances to CPAP and actively seek out dentists to fabricate oral appliances to prevent snoring and sleep apnea.

MYOFUNCTIONAL THERAPY IN ORTHODONTICS

Discover how to effectively screen your patients for myofunctional issues and integrate this into your orthodontic, restorative and cosmetic treatment planning. With myofunctional therapy, you can address underlying problems such as improper tongue posture, mouth breathing, and incorrect swallowing patterns, all of which can significantly impact dental and facial development. By incorporating these practices, you create comprehensive treatment plans that not only straighten teeth but also promote optimal breathing and muscular function.

This holistic approach ensures long-term success and stability of orthodontic treatments, as it encourages natural growth and development. Additionally, understanding the role of myofunctional therapy can set your practice apart, attracting patients who are seeking a more integrated and health-focused treatment strategy.

"By far, this is the best internet course I've ever taken. The convenience of use, the organization of the material, the ability to immediately apply what I learned, and the very helpful instructor, by far exceeded my expectations. I would highly recommend these courses to any general practitioner considering the practice of orthodontics."

MINI RESIDENCY IN ORTHODONTICS

This immersive two-year clinical program consists of 12, 1 1/2 day sessions held every two months at the Host Office, where you will work directly with patients and gain firsthand experience in the workings of an orthodontic practice. It promises to enhance your orthodontic skills, as you will be involved in treatment planning and all facets of patient care.

All sessions take place under the expert supervision of the Host Office DDS and their team, along with the Rondeau Seminars Instructor. We will provide support at every stage, from records to diagnosis, and through to treatment planning and execution.

If you're interested in joining a Mini Residency in Orthodontics, please reach out to Rondeau Seminars directly for further details.
