WHEN YOU NEED STRAIGHTWIRE WITH ALIGNERS

- | | | | |
|----|---|---|---|
| 1. | The best cases to treat with clear aligners are: normal vertical Class I, normal vertical Class II, normal vertical Class III (end-to-end) no anterior crossbite. | T | F |
| 2. | Major rotations are easily moved with aligners. | T | F |
| 3. | In general, crowding, spacing, overjet, overbite and open bite cases in the 2-3mm range are ideal treatment candidates for clear aligner therapy in a GP office. | T | F |
| 4. | Clear Aligners are designed to correct skeletal issues such as Class II and Class III malocclusions. | T | F |
| 5. | Utilizing functional appliances to correct Class II and Class III malocclusions is done prior to using Clear Aligners. | T | F |
