AMCOP & FROGGYMOUTH APPLIANCES:
MYOFUNCTIONAL BENEFITS

- | | | | |
|----|--|---|---|
| 1. | The AMCOP appliance can be introduced in young children, with certain appliances designed for use in children as young as 2.5 years of age. | T | F |
| 2. | The AMCOP appliance is designed to encourage proper tongue posture, including positioning the tongue toward the palate, to support balanced oral function and craniofacial development. | T | F |
| 3. | Different AMCOP appliances may be selected for growing patients presenting with Class I, Class II, or Class III malocclusions. | T | F |
| 4. | The Froggymouth appliance is most commonly used with children; however, adults may also benefit from its ability to encourage proper tongue posture, nasal breathing, and correction of undesirable oral habits. | T | F |
| 5. | The AMCOP appliance can be used to treat Class I, Class II, and Class III malocclusions in growing patients. | T | F |
